DE SMET ENGINEERS & CONTRACTORS has been created in 1990 by the De Smet Group with the intention to have an organisation totally dedicated to large projects, extending its expertise to process auxiliaries, site construction activities and project management.

Oils & Fats as well as **Sugar** have been the core of **DE SMET ENGINEERS & CONTRACTORS'** field of activity. A major diversification to **Biofuels** and **Bioenergy** has now taken place, based on a worldwide competence in project management acquired over the years.

DE SMET ENGINEERS & CONTRACTORS is not only equipment supplier, but also plant supplier and contract manager. It has developed the **Full Responsibility Concept**, based on a comprehensive range of multi-disciplinary resources.

From the initial study to vocational training, **DE SMET ENGINEERS & CONTRACTORS** has the ability and skill to **successfully complete large turnkey projects, even on a greenfield site**, all within the contractual budget and delivery time, whether on its own or in association with other companies.
